

Koushik Ahmed

Front-end Developer (React.js)

Mail: devkoushiik@gmail.com Phone: 01796-297945

Portfolio: [Link](#) Github: [Profile](#) LinkedIn: [Profile](#)

Address: Mirpur 2, Dhaka

I'm a passionate front-end developer specialized in React, TypeScript, and Next.js. I thrive in collaborative team environments, bringing creativity and technical expertise to build user-friendly and performant web applications. With a commitment to continuous learning, I stay up-to-date with the latest trends and technologies to deliver high-quality, scalable solutions.

Skills:

Front-end: HTML, CSS, Tailwind CSS, JavaScript, React.js, TypeScript, NEXT.js

Familiar : Git, Redux Tool Kit(RTK), React Query

Soft Skills : Fast Learner, Good Communication, Patience, Enthusiasm

Projects:

E-commerce - [Front-end Code](#) - [Live Here](#)

- I developed a fully functional e-commerce platform using React, Redux Toolkit (RTK), Tailwind CSS, and DaisyUI. The application features a sleek and responsive design, with Tailwind CSS and DaisyUI ensuring a consistent and modern user interface. State management is efficiently handled using Redux Toolkit, allowing for seamless product browsing, cart management, and user authentication. This project showcases my ability to integrate powerful front-end technologies to create a dynamic and user-friendly shopping experience.
- **Features** - Search, Sort, Pagination, Dark Theme, Cart system, Pagination
- **Technology** - HTML, CSS, React.Js, Tailwind CSS, DaisyUi, RTK

Game Showcase Website - [Front-end Code](#) - [Live Here](#)

- Created a game showcase website using React and the RAWG API, providing features such as loading skeletons, search functionality, sorting, pagination, caching, and dark mode. This project showcases skills in API integration, user experience optimization, and responsive design, providing an engaging platform for exploring games.
- **Features** - Search functionality, Sorting, Pagination, Caching, and Dark mode
- **Technology** - HTML, CSS, React.Js, Tailwind CSS, Chakra-ui, Tanstack Query

Pizza Delivery Application - [Front-end Code](#) - [Live Here](#)

- Developed a basic yet functional pizza shop website using React.js, incorporating essential features to create a smooth user experience. Key functionalities include a search feature for quick item discovery, an add-to-cart option for easy order management, and real-time dynamic calculations that update prices as items are added or modified in the cart. This project highlights my ability to implement core e-commerce features and enhance user interactions through responsive UI elements.
- **Features** - Cart system, Search Pizza, Dynamic Payment Calculation, Checkout
- **Technology** - HTML, CSS, React.Js, Tailwind CSS, RTK

Job Application Tracking - [Front-end Code](#) - [Live Here](#)

- Developed a comprehensive job tracking website using the MERN stack (MongoDB, Express.js, React, Node.js). The application allows users to manage and track their job applications with statuses such as "Interview," "Pending," and "Declined." Implemented robust user authentication, including login and logout functionality. Handled complex middleware configurations and efficient error management to ensure a seamless user experience.
- **Features** - CRUD, Filter Jobs, Pagination, Authentication, Stats, Admin Dashborad.
- **Technology** - HTML, CSS, Tailwind CSS, Styled Components, Mongo DB, Express, React JS.

Education:

Institute : Magura Polytechnic Institute (MPI)

CGPA - 3.69

Department - Computer Technology

Institute : Bangladesh University of Business and Technology (BUBT)

Status - In Progress (3 semesters remaining to graduate)

Department - Bachelor of Science in Computer Science and Engineering (CSE)
